

WHAT IS 400 TREES GLOUCESTER?

This three part program will take place between 2023 and 2024 and will include: Planting 400 trees in Gloucester, locating and documenting the oldest trees in the city and educating adults and children about the value of trees to the city and our local ecosystem.

VISION

400 Trees Gloucester is a sustainability program combining natural history, environmental stewardship, experiential education, and community participation to create a living legacy for generations to come. It is a collaborative project of Gloucester 400+ and Biomimcry New England with support from the City of Gloucester Departments of Public Works and Health.

100 Trees Project, Cape Ann YMCA,
Sawyer Free Library

Sponsors: Cape Ann Tree Service,
Jane Deering Gallery, W.T. Rich Company

HOW WE WORK

The City of Gloucester has committed to planting 200 trees in our parks, forests, and public spaces.

Cape Ann Elms and Biomimicry New England have each committed to giving away 100 free trees to willing Gloucester residents.

Biomimicry New England will host tree planting and maintenance training sessions to build a cohort of citizen tree stewards.

Biomimicry New England will partner with the Sawyer Free Library and local schools to develop a 400 Trees Gloucester curriculum for youth to be hosted at youth organizations and schools.

Join us by filling out our volunteer form or requesting a free tree at the QR code above

PLANT A TREE

400 Trees Gloucester is looking for residential locations in central Gloucester to plant trees.

Click the QR code to fill out a form to request a free tree!

GET INVOLVED

Educators: We have teaching materials to share related to trees, especially those planted on your school grounds!

Landscapers: Do you have a truck or other tools (or know-how!) to help us plant trees? We'd love your help!

Click the QR on this brochure to get involved with 400 Trees Gloucester!

We won't get to 400 trees without you! 400 Trees Gloucester is looking for volunteers to plant trees and more!
